COLD STORAGE REPORT
AS OF JULY 1, 1943

The quantities of perishable food commodities held in cold storage warehouses and meat packing plants reporting to the War Food Administration as of July 1, 1943 are indicated in the accompanying tables.

All items in cold storage with the exception of frozen and cured beef, pork and frozen lamb and mutton showed substantial increases from a month earlier.

The into-storage movement of creamery butter, cheese, frozen eggs, frozen trimmings and offal and lard during June were significantly heavier than normal for the period.

Accumulations of frozen fruit holdings were less than one third of average for June and frozen vegetables slightly above those of a year ago.

July 1 stocks of frozen vegetables, creamery butter, shell and frozen eggs and lamb and mutton were well above those of a year earlier and the 1938-42, 5-year average. Conversely frozen fruits, cheese, frozen poultry, and frozen and cured pork were below those of a year ago and the average. However, in the case of fruits, stocks were below the average also; but lamb and mutton and trimmings were above average. Lard stocks were above those of a year ago, but below the average.

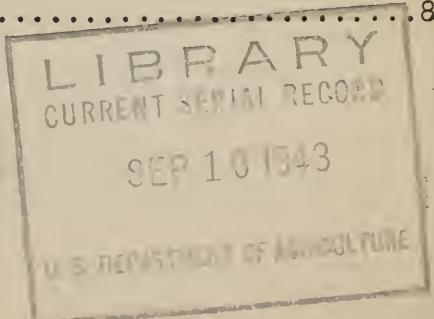

Space occupancy of public refrigerated warehouses on July 1, showed a sharp increase over a month earlier. Cooler occupancy was indicated at 75 percent of capacity and freezer at 76 percent, which compares with 68 and 67 percent respectively for June 1, 1943. This situation seems to follow the seasonal pattern and is generally consistent for the whole country.

Contents of July 1, 1943, Cold Storage Report

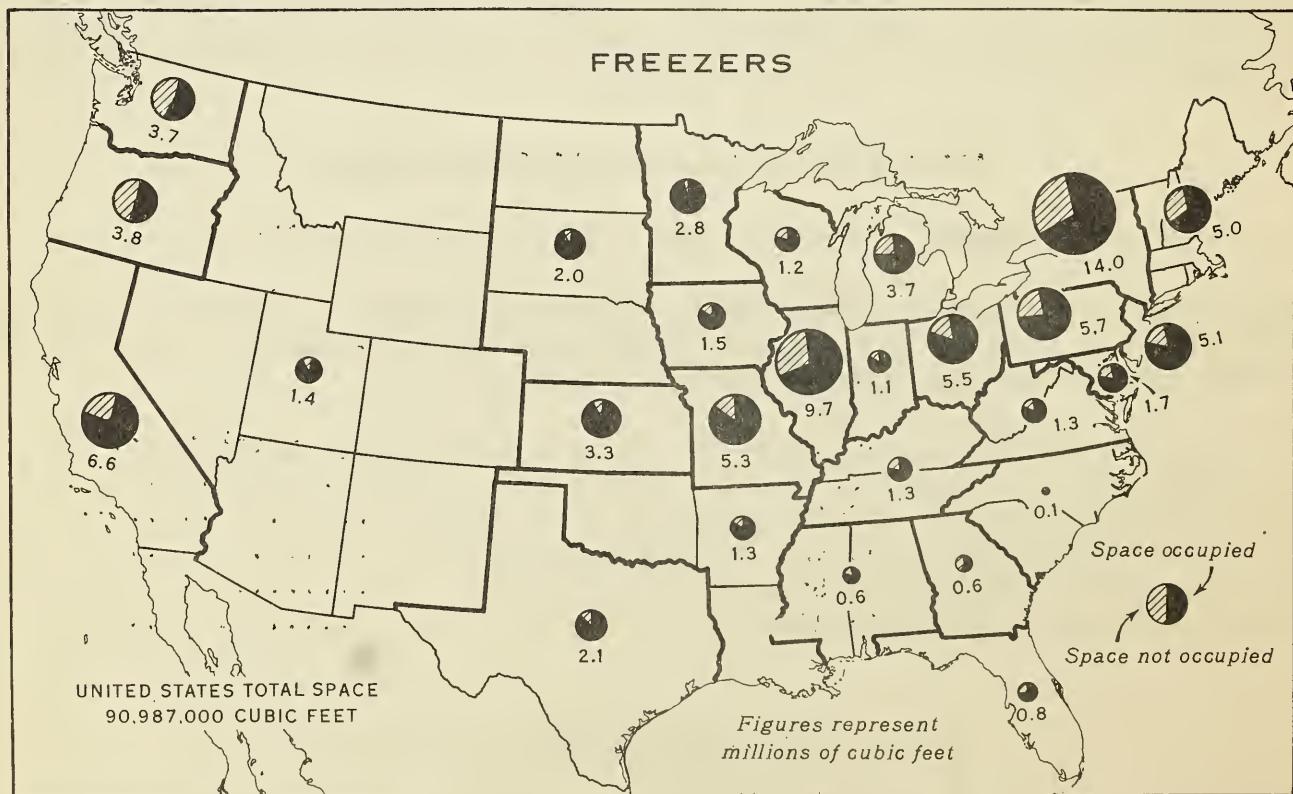

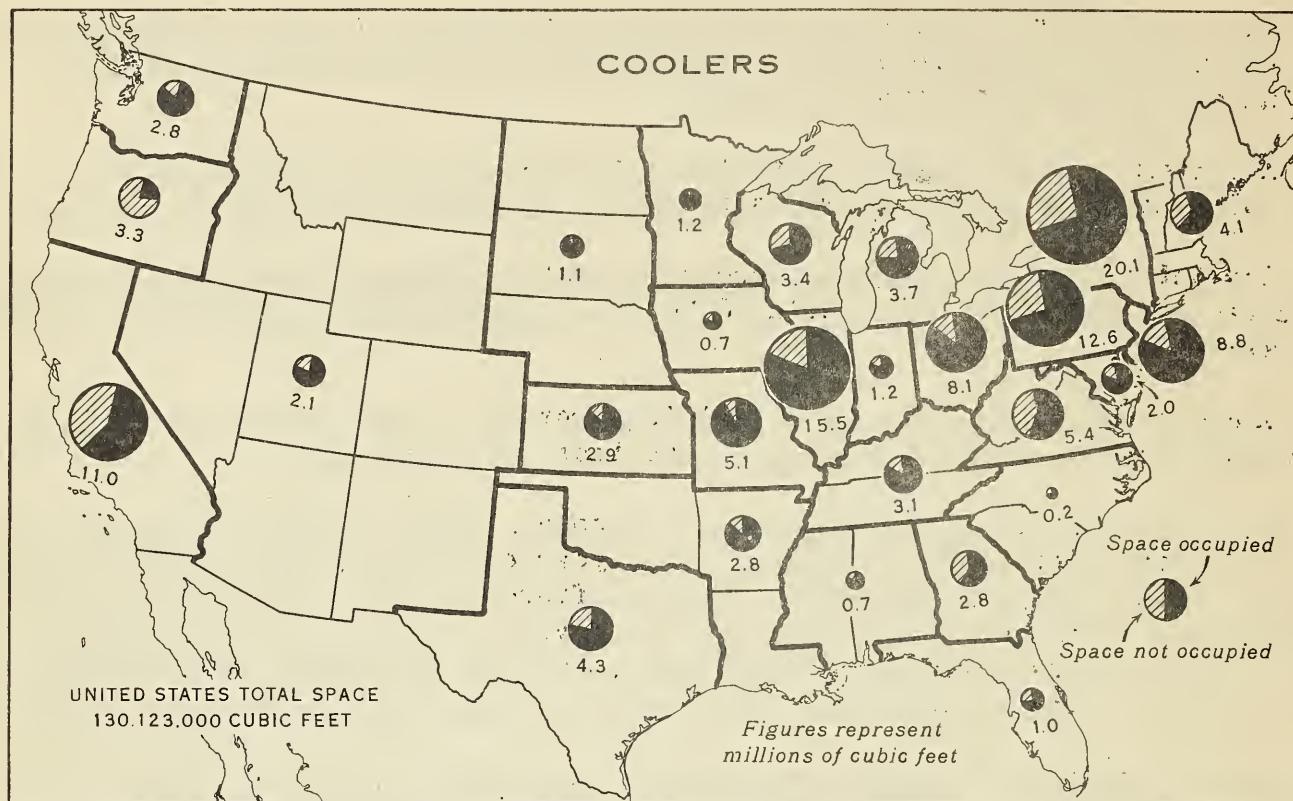

Separate tables appearing in this report represent holdings of the following groups of commodities on hand in cold storage warehouses and meat packing plants on July 1, 1943, with comparisons for previous related dates:

1/ Reported to the Department of Agriculture as of June 16, 1941.

2/ Percentages for the periods covered here were made as comparable as possible.

3/ Preliminary.

4/ Weighted average of the occupancy for geographic divisions using the corresponding net piling space as weights.

FRUITS AND VEGETABLES

Frozen and preserved fruits held in cold storages in the United States on July 1, 1943 totaled 106,656,000 pounds. This quantity is 22.7 million pounds less than that on hand on July 1, 1942 and 18.4 million pounds less than the July 1 average for the 5 years 1938-42. The net quantity going into storage during June was 10.1 million pounds which compares with 22.8 million during June 1942 and a 5-year average of 34.2 million pounds.

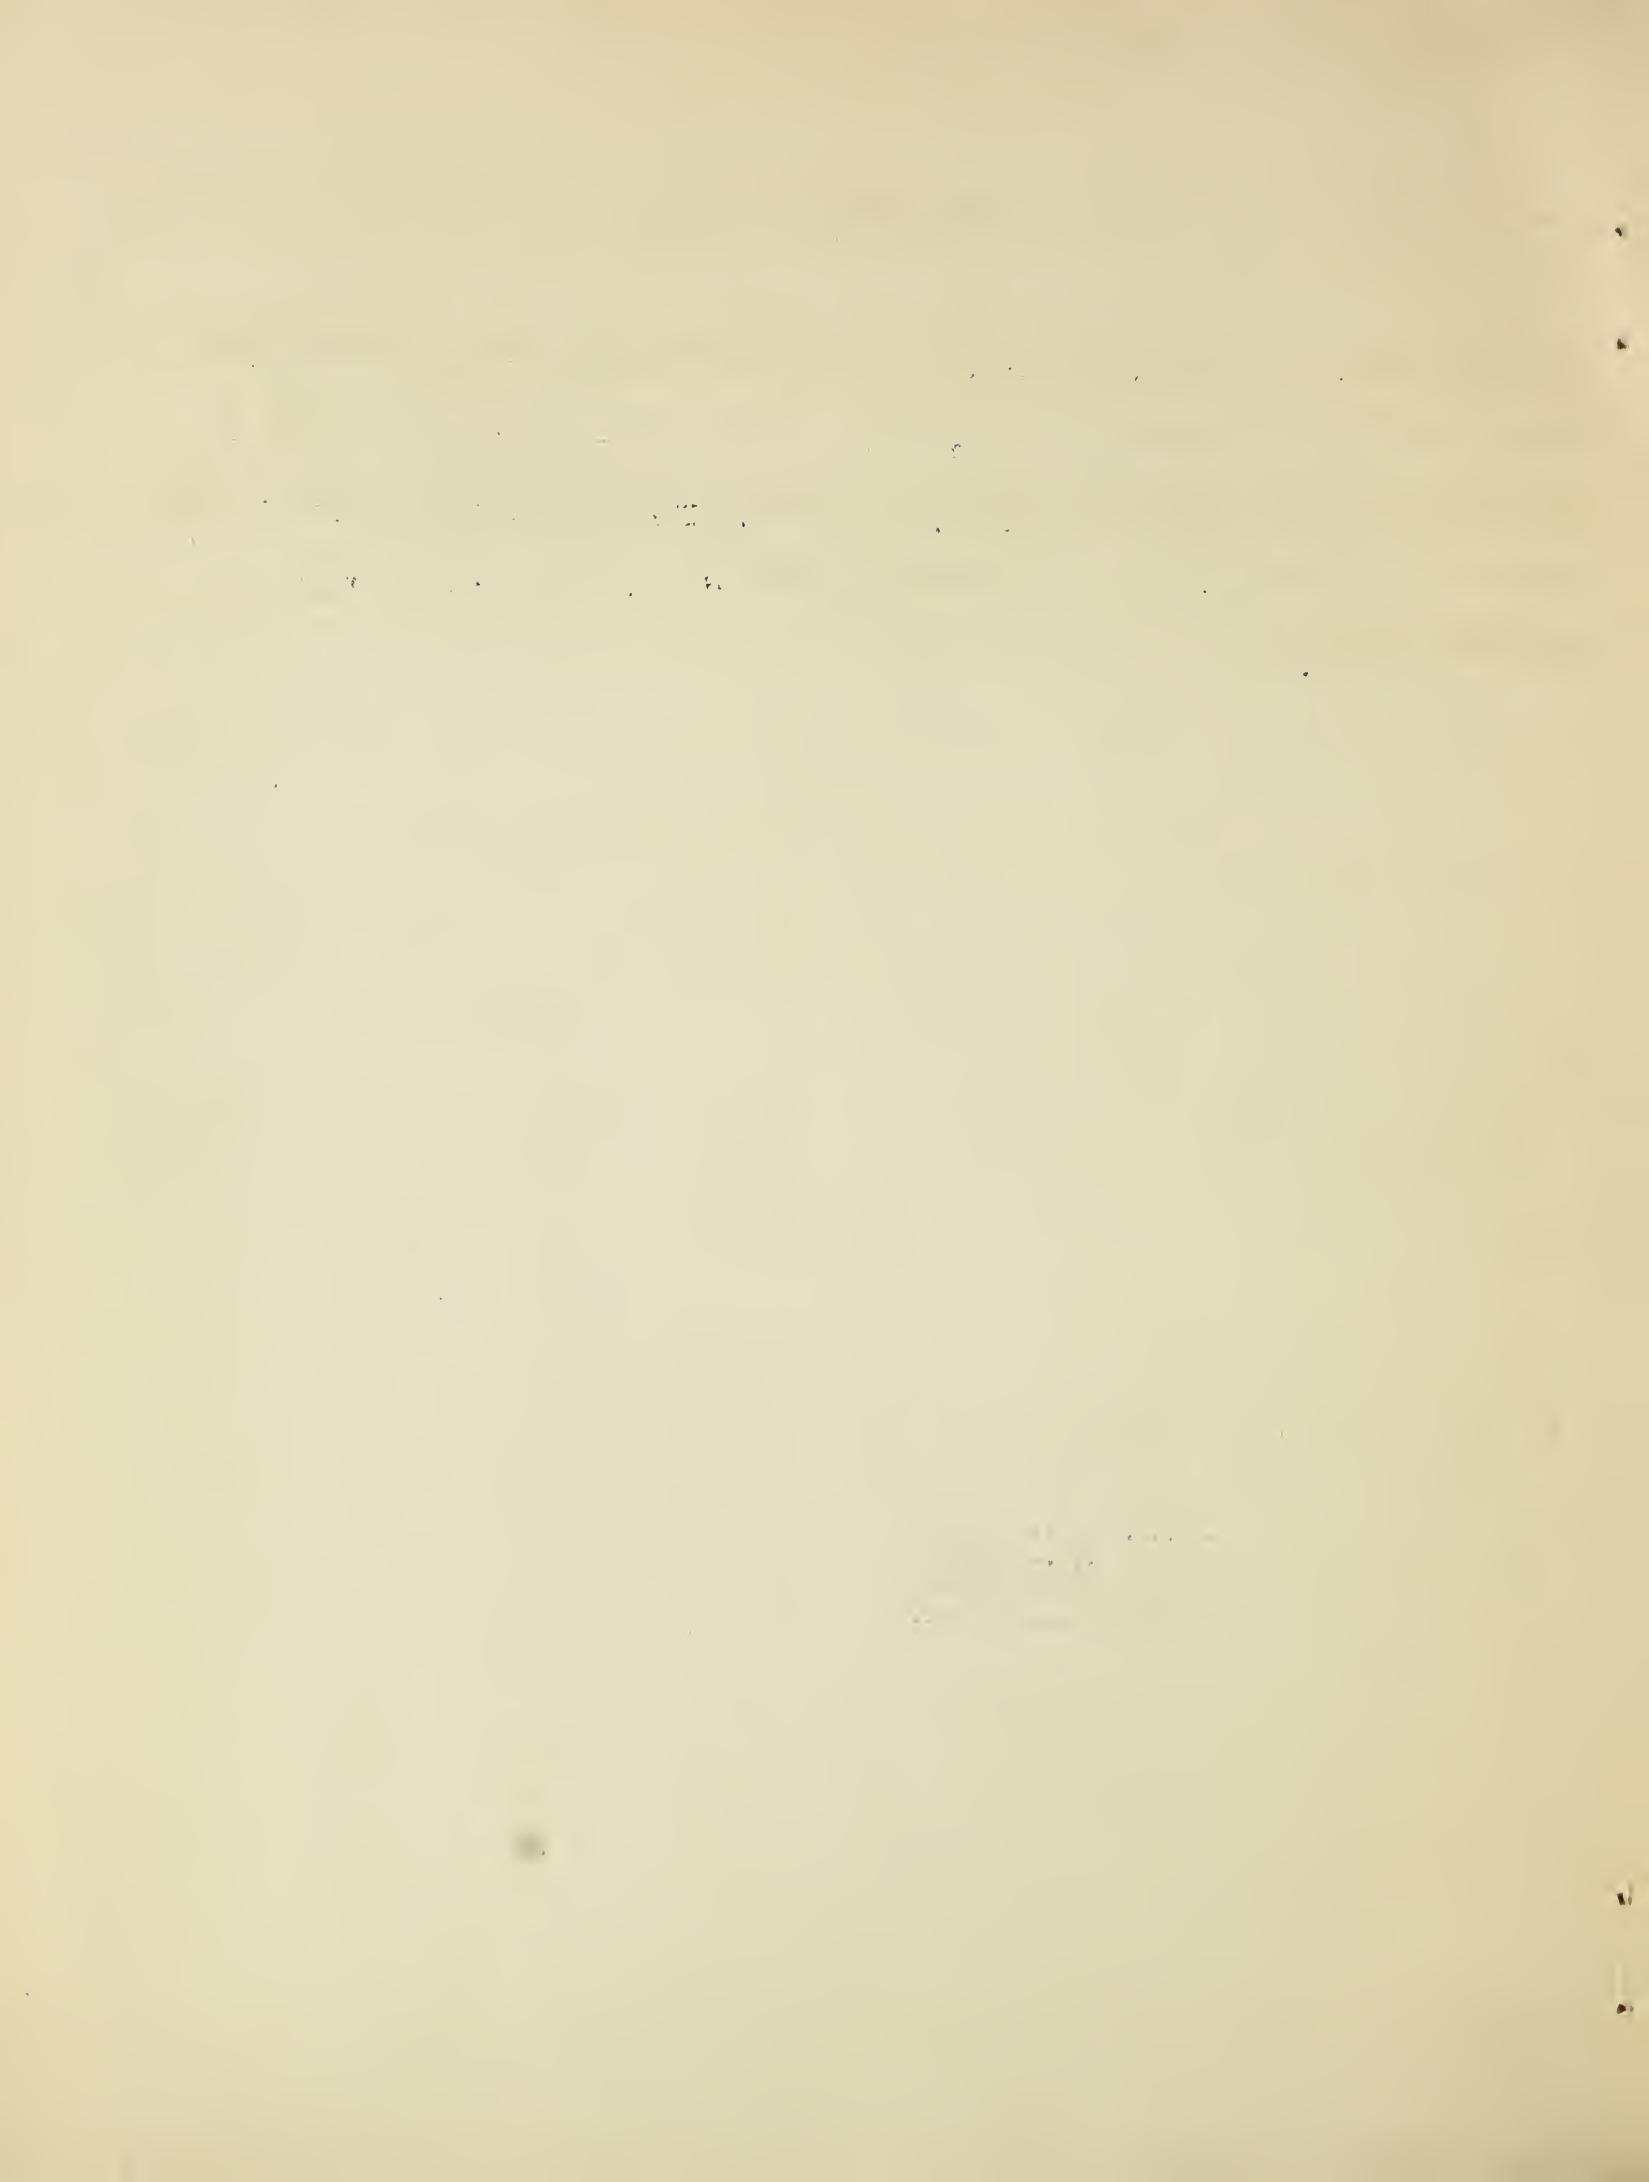

Frozen vegetable stocks were reported as 73,207,000 pounds which is 7.8 million pounds greater than that on hand a year earlier and 20.6 million pounds above average. The net accumulation during June 1943 was 16.5 million pounds compared with 15.8 million pounds during the same period of 1942.

(See table on page 8 for July 1, 1943 holdings by geographic divisions)

CORRECTION

Information just received indicates that 578,000 pounds of government owned butter were omitted from one of our reports. This means that 578,000 should be added to U. S. total making it 157,955,000 pounds. This amount is included in the figures of government stocks as indicated - commercial holdings should read 49,203,000 pounds.

DAIRY AND POULTRY PRODUCTS

There were substantial increases in stocks of all manufactured dairy products and eggs during June 1943. Creamery butter holdings totaled 157,377,000 pounds. This quantity is 40.3 million pounds greater than that of a year earlier and 43.1 million pounds above the 5-year (1938-42) average. It is reported that included in total stocks are 15,229,000 pounds owned by F. S. C. C. and F. D. A. and 93,523,000 pounds owned by D. P. M. A.

Stocks of all varieties of cheese while increased by 47,134,000 pounds during June to a total of 144,461,000 pounds on hand July 1, were 117.5 million pounds below those of a year ago and 2.3 million pounds below average. U. S. Government agencies own cheese included in the above totals as follows: F. S. C. C. and F. D. A. 6,118,000 pounds and D. P. M. A. 13,006,000 pounds.

Holdings of eggs were increased during June by the equivalent of 2,619,000 cases made up of 729,000 cases of shell and 70,856,000 pounds of frozen. July 1 stocks were 8,995,000 cases of shell and 322,382,000 pounds of frozen, a total case equivalent of 17,592,000. July 1 stocks were the equivalent of 2,230,000 cases above those of a year earlier and 5,838,000 cases above average.

Total stocks of frozen poultry indicated a slight increase during June. The 25,193,000 pounds on hand July 1 however were 54 million pounds below those of a year earlier and 48.4 million pounds below average.

1/ Frozen eggs are converted on the basis of 37.5 pounds to the case.

2/--SPECIAL NOTE: 81 percent of total frozen eggs reported as of July 1, 1943, were classified as follows: Whites 15 percent; yolks 11 percent; and mixed 74 percent.

MEATS AND LARD

A total of 704.6 million pounds of frozen and cured meats was reported held in cold storage warehouses and meat-packing plants on July 1, 1943. This quantity indicated a net reduction since June 1 of 9.1 million pounds. July 1, 1943 holdings were 16.5 million pounds less than those of a year earlier but 21.6 million pounds above the 1938-42, 5-year average. Frozen and cured beef stocks were slightly below those of a year ago but 28.7 million pounds above average, showing a total of 81.4 million pounds. Total pork stocks of 515.5 million were 6.8 million pounds below those of July 1, 1942 and 32.3 million pounds below average. Lamb and mutton holdings were 7.9 million pounds or 2.5 million above a year ago and 4.6 million pounds above average. Stocks of trimmings and offal totaled 99.9 million pounds. This quantity is 12.2 million less than that of a year ago but 20.6 million pounds above average. Lard and rendered pork stocks were 220.2 million pounds or 118.9 million pounds above those of a year earlier and 7 million pounds above average. Included in these figures are holdings by F. S. C. C. and F. D. A. in plants outside of processors hands of 215,693,000 pounds of frozen and cured pork cuts and 109,865,000 pounds of lard and rendered pork fat.
